Comprehensive Architectural Studio for 5th year students, (Subject: The design of a piece of furniture to a city and in approach from a comprehensive and complex building program to a critically-driven speculation)

Researches

- **Gundishapur Research Program on the Title of “Religious Tourism, Heritage and Urban Projects in the City of Mashhad”,** 2019-2020
P: Iranian Project Manager / C: The Center for International Scientific Studies & Collaboration (CISSC), Ministry of Science, Research & Technology of Iran and French Embassy in Iran, Iran
 - **Research Fellowship for Post Graduates on the Title of “The Application of Vernacular Knowledge in Contemporary Housing Design”,** 2007-2009
P: Research Assistant / C: School of Graduate Studies, University Putra Malaysia
-

In Progress Interested Researches

- **Toward a Happy Island: Developing Tourists’ needs in Close and Open Public Spaces (Case study: Kish Island):** The outputs lead to the design of urban public spaces for the island because tourism takes precedence over other development strategies. This research aims to present and identify the needs of a tourism island and thus create a new link between the four bodies of knowledge; small island, tourism industry, urban design and happy city.
 - **Future of Public Spaces Design in the Post-Covid19 Era: Is Architectural Symbiosis a Proper Answer?** The results indicate that, through using architectural design techniques, the areas related to tourism activities can be designed in such a way to provide the background for common human behaviors and for understanding the existing behavioral and cultural differences between hosts and tourists based on symbiotic approach.
 - **From Naghsh’e Jahan in Isfahan to Padang in Singapore: A dialogue between West and East via Iran:** Naghsh Jahan Square was built in the early 16th century and is still one of the most vibrant urban spaces in Iran and has been registered as a UNESCO World Heritage Site. The simultaneous relationship between urban design developments in Europe and Iran, especially between the cities of Rome and Isfahan and its subsequent effects in Europe and Asia is the main subject of this research. The design of many urban spaces in Southeast Asia has been influenced by Western tourists who passed through Iran to go East. The study also seeks to explore the legitimacy of the Naghsh’e Jahan Square as an inspiration for Padang Singapore.
-
